

Teflone

A Magical Substance

1. A CLEAR VIEW WIPER BLADE

The teflone coating on the surface of the rubber blade lowers the coefficient of friction & makes the wiper blade slippery. Therefore it has chatter-proof and squeak proof properties, & can give you a cleaner wipe.

2. SILENT OPERATION

There is no noise when you mount our wiper blade on your car, Because Teflone will make the wiper blade slippery.

3. MUCH LONGER LIFE

The wiper blades with teflone won't crack, adding more durability and longer life. The life of this kind of wiper blade is atleast 30%.

4. A BAD WEATHER RESISTANT WIPER BLADE

With the repellent properties of Teflone, this kind of wiper blade is repellent to water, snow, ice & other harsh elements.

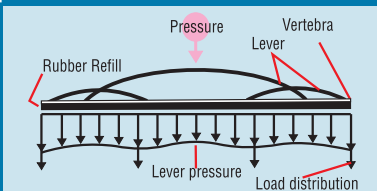

5. A SAFER AND MORE RELIABLE WIPER BLADE

This is a product, which is 100% reliable. You can feel safe while driving at all times.

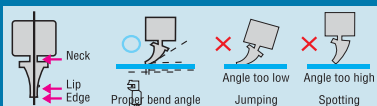

How the Wiper Blade Wipes the Glass:

The wiper blade is mainly comprised of the lever, rubber refill, adaptor and the rivets that bind each of the components together.

In order for the wiper blade to function properly, the entire length of the blade must be held against the surface of the glass with equal pressure.

In order to create a uniformly spread film of water on the surface of the glass, the wiper blade must press against the glass at a narrow angle range of 30 to 50 degrees.

FALCON

Ultimate Performance
In All Weather Conditions

Upgrade from Conventional Design

- Riveted Metal Frame with Aerodynamically Designed Hard Plastic encasement Provides: Protective Shield From snow & ice clogging in inclement weather conditions. Wind lift resistance & even pressure distribution.
- Nano graphite and PTFE coating on synthetic rubber formulation gives more durable, noise free wiping performance.
- Unmatched ease, safety and connection profiles.
- Fits all Japanese vehicles.
- Fits all wiper arms Hook 9x3.

WIPER ARM FITMENT

APPROVED AS ORIGINAL EQUIPMENT BY LEADING INDIAN & OVERSEAS VEHICLE MANUFACTURERS

**FLAT HYBRID
WIPER BLADES**

**UPGRADE FROM FLAT
BLADE TO A NEXT
GENERATION
WIPER BLADE
DESIGN**

**FLAT WIPER
BLADES**

**UPGRADE FROM CLASSIC
BLADE TO A NEW
GENERATION
WIPER BLADE
DESIGN**

**Uniquely
engineered
for Precision
contact with highly
curved windshields**

Features & Benefits:

Original factory quality for the same fit & functions as good as when the vehicle was new.

PTFE coating on rubber surface provides a smoother wipe & longer life for a wiper blade.

Memory curve steel provides uniform pressure for the clearest wipe.

Exclusive dual-point coupler balances wiper pressure to give streak free wipe.

HEAVY DUTY M8 BOLT FIT WIPER BLADES

For Buses & Coach buses (Clamp inner width 26.50mm)

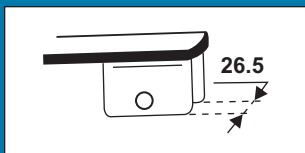

CAMOFLEX offers the largest selection of Heavy duty wiper products in the market today. With a full range of wiper blades & wiper arms with bolt fit clamp inner width 26.50mm, CAMOFLEX has the wiper products for all types of buses. This size range consists of lengths between 28" & 40".

Features & benefits:

The 1.50mm Robust steel frame is riveted with inter-yoke & Side-yoke, SS Vertibra & Synthetic rubber refill, completing the Heavy duty Wiper Blade assembly.

The 10mm rubber refill has a Nano graphite and PTFE coating. Synthetic polymer rubber formulation gives more durability, noise free and streak free wiping performance.
